

Lumen Update - Discipline Processing - New Discipline History tab

When entering and updating discipline information principals can now access a student's history by clicking on the new Discipline History tab.

The screen shot below shows where you can access this new tab. You may call up any student discipline record and you will see the Discipline History tab.

The screenshot displays the 'School Discipline Processing (Admin Access) - Principal Discipline Processing' interface. At the top, there is a navigation bar with 'File' and 'View' menus, and buttons for 'Back', 'Next', 'Search', 'Clear', 'Refresh', and a dropdown for 'Principal Discipline Processing'. Below this is a header for the student: 'D. - Grade: 10, Age: 17, School: Central High School'. The main content area is titled 'Add Infraction Definition' and features four tabs: 'Offense', 'Discipline', 'Documentation', and 'Discipline History'. The 'Discipline History' tab is circled in red. Below the tabs is a 'General Information' section with the following fields: 'Offense Category' (Classroom or School Disruption), 'Offense' (Trifling), 'Date of Infraction' (11-21-2007), 'Time of Infraction' (10:45 am), and 'Sp Ed Student at the time of the Offense' (No).

Additional Discipline Reports

There have been a set of new discipline reports which directly address the needs of the Post Secondary School Improvement Grant which a lot of you are in. These are useful reports for discipline reporting as well. The graphing feature in these reports will be in place by Thursday of this week.

There are district and school level reports. Your Lumenation administrator

will have to give you rights to these applications.

These applications will help central office admins and principals prepare and analyze their discipline data.
